Projects

Ecommerce Website / MERN Stack

Oct 2024 - Nov 2024

- Developed a full-fledged e-commerce platform where users can browse and purchase products across various categories, including clothing.
- Successfully applied **MERN stack expertise** to develop and deploy a fully functional web application.
- Enabled product search, filtering, sorting, and category-based browsing for a seamless shopping experience.
- Designed a scalable backend using Node.js and Express with MongoDB as the database for efficient data storage and retrieval.
- Added real-time delivery tracking feature to enhance customer experience.
- Github Repository Link: <https://github.com/Kalyan-77/ShoppingWebsite>

FilmSpotLight/ HTML, CSS, Bootstrap, PHP

Sept 2024 - Oct 2024

- Developed a **dynamic film website** that allows users to search for movies based on genres, release dates, and ratings.
- Enabled users to book movie tickets through an integrated booking system.
- Implemented **user authentication** (signup/login) using PHP sessions for personalized recommendations.
- Enabled **real-time search functionality** and interactive movie filtering for better user experience.
- Github Repository Link: <https://github.com/Kalyan-77/FilmSpotLight>

Travel App Design| Figma

Sept-2024 – Nov 2024

- Designed a user-friendly and visually appealing travel App using Figma.
- Created low-fidelity wireframes, high-fidelity UI designs, and an interactive prototype for seamless user experience.
- Developed a design system with consistent typography, colour schemes, and UI components.
- Ensured the platform supports destination exploration, trip booking, and essential travel information access

Certificates

Data Structures and Algorithms

June 2024

Board Infinity
